

Lab. 6

DT

Aims:

To solve a classification problem using DT (decision trees).

Task:

Solve the problem classification problem from the given database using DT (decision trees) without tools.

Points:

- 80 points - the algorithm.
- 10 points for the architecture and for the quality of your application.
- 10 points for accuracy over 80%.

Time:

The deadline is at the beginning of the 7th laboratory.
